Experience

03.2025 - 02.2026
Frontend Developer
Kian Financial Group

- *Developed modern, responsive web applications with a focus on UI/UX and performance (React, Next.js)*
- *Optimized Next.js application performance, improving load times by approximately 40%*
- *Collaborated closely with backend, QA, and product teams to deliver scalable solutions*
- *Integrated REST APIs and backend services into scalable frontend architectures*
- *Implemented unit tests using Jest and API mocking with MSW*
- *Applied accessibility standards (WCAG) to enhance usability*

03.2025 – 10.2025
Full-Stack Developer (Remote, Part-time - Canada)
CELPIP Practice Test

- *Developed and maintained a scalable SaaS platform using Next.js and TypeScript*
- *Built interactive, user-centered interfaces for learning modules and online tests*
- *Contributed across both frontend and backend layers to ensure overall functionality*
- *Improved scalability and performance through caching and code-splitting techniques*
- *Managed deployment and environments using Vercel*
- *Contributed to the design of a scalable and maintainable system architecture*

03.2024 – 03.2025
Full-Stack Developer
Daric Data Processing

- Developed multilingual web applications using Next.js, TypeScript, and Tailwind CSS
- Implemented features with integrated backend functionalities
- Enhanced UI/UX with a focus on usability and consistency
- Optimized performance and accessibility following modern best practices

03.2024 – 03.2024
Frontend Developer
Asa Co

- *Contributed to technical decision-making and supported team members during implementation*
- *Developed banking dashboards using Next.js and TypeScript*
- *Optimized user interfaces for performance and usability*

03.2022 – 03.2024
React Developer
Hafez Brokerage

- Optimized performance and modernized a PWA to improve load speed and user experience

03.2019 – 03.2022
Software Developer | Web Applications & APIs
Novin Hi-Tech Solutions

- *Developed internal web applications and APIs*
